

Connector for connecting a fibre feeding duct to a
carding machine

ABSTRACT

A connector (10) for a duct (1) for the pneumatic
5 feeding of fibre to at least one carding machine (2) has
an upstream portion (14) and a side duct (18) having a
through opening (20) for fibre feeding to the carding
machine (2).

The connector comprises "stepped" means (22) for
10 deflecting the stream of fibre, and lead-in bevels (41,
42) or a closing wall (100) inclined for the end-of-line
connector, in order to even out the density of fibre sent
to the carding machine.
